5. Rebekka Vedina. A comparison of the collectivist attitudes and perceptions of organisational culture among Russian-speaking organisational members in Lithuania and Estonia	101
6. Elina Tolmats. Relationship between organisational culture and individual values of the Russian-speaking members of an organisation in Lithuania	118

Part Two.

Consequences and implications

7. Uku Mats Peedosk. Socialisation tactics: an empirical study of the Estonian defensive force	135
8. Gerda Mihhailova, Kulno Türk. Leadership's influence on company success and employees' work satisfaction as indicated by the MLQ questionnaire (the case of AS Cibus)	151

9.	Made Torokoff. Cooperation in the general education system	170
10.	Merike Kaseorg. People's attitudes towards the application of information technology in Estonian companies	191
11.	Natalia Karotom. Changed work: a challenge to organisations and their members	208
12.	Anne Reino. Organisational values: a concept and research methods	224
13.	Kaia Kask. The influence of investors' behaviour and organisational culture on value investing	237
14.	Tõnis Mets. Coordination of knowledge and competence	256
Appendix		
15.	Janita Andrijevskaia, Maaja Vadi. Recent trends in organisational culture studies in Estonia	271

List of Figures

2.1. Existing and preferred culture	51
7.1. Means of measured collectivism in groups	142
7.2. Means of measured values (goals) in groups	143
7.3. Means of values (modes of conduct) in groups	144
8.1. Work satisfaction of transactional and transformational leaders' followers	166
9.1. Life span from the aspect of economic activities	173
9.2. Participants in the cooperation survey	178
9.3. Questions in the cooperation block.....	179
9.4. Who taught the school leavers to study?	180
9.5. Parents' expectations about school	182
9.6. Mediation of information between home and school ..	183
9.7. Opinions of directors of studies about their teachers' level of performance	185
9.8. Assessment provided by the administration that the teachers knew of	185
10.1. Correlation tree	199
10.2. Correlations between the statements and statement pairs	200
12.1. Framework of values research	230
13.1. Decision-making style categories	244
13.2. Heuristics and biases related to heuristics	245
13.3. Investors' causes of action in the stock market derived from their behaviour	247
13.4. Direct and indirect impacts of the factors influencing the excess return from value investing	250
14.1. Framework of competence leverage and coordination in a multidivisional corporation	265

List of Tables

1.1. The results of Hansapank in the competition for the Best Employer Award 2002	37
2.1. Points for the existing and preferred culture	50
3.1. Connections between attitudes and relationship orientation of organisational culture within different groups (according to standardised coefficient Beta)	74

4.1.	The distribution of the sample between various socio-demographic groups	88
4.2.	The significant variables of four logistic regression models	91
4.3.	The percentage of correct classifications in different models	92
5.1.	Pearson correlations between the RUSCOL and QOC subscales	111
6.1.	The mean values and standard deviations of top 5 terminal and instrumental values	125
6.2.	Spearman's correlation coefficients ($\rho \geq 0.20 $; $p \leq 0.001$) between organisational culture orientations and values	126
6.3.	Spearman's correlation coefficients ($\rho \geq 0.20 $; $p \leq 0.001$) between organisational culture orientations and values in respect of the respondents' gender	127
6.4.	Spearman's correlation coefficients ($\rho \geq 0.20 $; $p \leq 0.001$) between organisational culture orientations and values in respect of respondents' positions	128
7.1.	Analysis of variance in collectivist subscales	141
7.2.	Analysis of variance in goals components	143
7.3.	Analysis of variance in the modes of conduct components	144
7.4.	Regression analysis of satisfaction	145
7.5.	Regression analysis of commitment	146
8.1.	Cronbach's α by leadership style	164
10.1.	Use of information technology	196
11.1.	Transformation of work and work paradigm	216
13.1.	Approaches to investing	238
13.2.	Value vs. growth in international equity markets from Capaul, Rowley and Sharpe's Analysis	241
13.3.	Average annual percentage movements of the DOW sorted by P/E (1937–1969)	241
13.4.	Worktable to identify common factors in the organisational culture of value companies	248
15.1.	Number of works on selected keywords	279

List of Appendixes

3.1. The manifestation of attitudes and organisational culture for groups having different social-demographic characteristics	80
10.1. Statements in the questionnaire (keywords: fear and reluctance)	206
10.2. Correlations between the statements in Appendix 10.1	207
15.1. Survey of organisational culture studies conducted by students of several universities	288
